

「Dried squid roll machine, 5 rolls in a row」

Some features of the machine

- Strength enough for a long time use with a simple structure.
- Some feature of the rolls for the dried squid not to be torn.
- Smoothly discharged dried squid by the installation of upper and lower peeling metals that prevents the squid from being caught on.
- Quickly rolled out dried squid due to the rotation difference of each roll.
- Best for rationalization with the low price.

Size of Machine : 880mmL × 540mmW × 885mmH

Motor : Three-phase 0.75Kw

Weight : About 100Kg
